Attn: Dave Peters, State Conceptual Design Group Manager

SUBJECT: Request for Location and Design Approval

Description and Project Proposal: The proposed project will replace the existing 64-foot long bridge at SR 16 and Short Creek with a 105-foot long bridge. The overall project length is approximately 0.3 miles, beginning approximately 550 feet west of the existing bridges and ending approximately 650 feet east of the existing bridges. The project is in Warren County, approximately 6.3 miles southwest of Warrenton. The existing bridge will be replaced with a bridge that meets current standards. The proposed roadway typical section consists of 12-foot-wide travel lanes and 10-foot-wide shoulders (4-foot paved). The proposed bridge typical section consists of 12-foot-wide lanes and 8-foot-wide shoulders.

An off-site detour will be utilized, diverting traffic entirely on other state routes. The detour route will travel along SR123, SR102, SR171, and SR12 Bypass, resulting in an additional 19 miles along the detour route. Construction will last approximately 12 months.

Concept Approval Date: December 12, 2018

Concept Update: No revisions have been required.

The required right-of-way has been revised since the approval of the Concept Report. Impacted properties were not increased.

Environmental Document Type: NEPA - PCE

Approval Date: ~~Pending~~ June 4, 2020

Public Involvement:

- Public Hearing Open House: N/A
- Public Detour Open House:
 - A Public Detour Open House was held on November 29, 2018 at Long Creek Baptist Church. During the meeting, one attendee had question and concern regarding the length

- of the detour that the public may use the county roads that will be a very short detour around this project.
- No comments were received via the court reporter, mail, online.
 - A total of 3 people attended the open house; none were public officials. No significant project changes were made since no comments were received.

Consistency with Approved Planning: The design description as presented herein and submitted for approval is consistent with the approved Concept Report.

Recommendations: Recommend that the location and design for the project be approved and that the attached Notice be approved for advertising.

NOTICE OF LOCATION AND DESIGN APPROVAL

**P. I. 0007057
CSBRG-0007-00(057)
WARREN COUNTY**

Notice is hereby given in compliance with Georgia Code 22-2-109 and 32-3-5 that the Georgia Department of Transportation has approved the Location and Design of this project.

The date of location and design approval is: **June 5, 2020**

The proposed project replaces the existing bridge at SR 16 and Short Creek. The project is in Warren County, GMD 154, approximately 6.3 miles southwest of Warrenton. The proposed roadway typical section consists of 12-foot-wide travel lanes with 10-foot-wide shoulders (roadway) and 8-foot-wide shoulders (bridge). The project length is approximately 0.2 miles.

The proposed bridge will be replaced at the current location; traffic will be maintained during construction via an off-site detour. The proposed detour route is approximately 19 miles and construction time is estimated to last 12 months.

NOTE: Ordinarily the maps or plats would be available for public review at our area office. Due to current COVID-19 measures, members of the public are not allowed to enter state buildings at this time. We apologize for the inconvenience. Anyone with questions or concerns about the project should call or email the area engineer listed below. To obtain copies of the drawings, maps or plats, please follow the instructions outlined below.

Billy Baxter, Assistant Area Engineer
District 2, Area 4
